

RENA and InnoLas Announce Technology and Sales Cooperation

- **RENA and InnoLas- Selective Emitter Solutions at its best**
- **RENA will sell InnoLas SE- Equipment**
- **Cooperation for High Efficiency Cell Technology**

Gütenbach, Krailling, September 6th, 2011.

The two German based companies RENA and InnoLas will cooperate to combine their know-how for high efficiency solar-cell production. The new combined process sequences like laser doping for selective emitter technology will speed up the development of easy-to-fabricate high efficiency cells.

RENA is one of the leading equipment companies for wet processing applications in the solar cell production with a worldwide service net.

InnoLas is a specialist for laser processing and laser equipment with know-how in laser doping of solar cells.
