

SOLAR RCC

R|E|N|A|.

RENA Compact Cassette

The RENA Compact Cassette is our cost-efficient solution for wafer transportation and buffering. Meeting the requirements of automatic handling systems has been a guideline of our cassette design.

Areas of application

- Handling of wafers around dry processes
- Transportation and buffering of wafers between processes
- For dry applications only, no contact with chemicals

Features and benefits

- Rigid design, yet extremely light-weight
- Large access area top and bottom
- Wide slots
- Cost-efficient
- Wafer protection maximised by rigid and closed side plates
- Stackable fully loaded

RCC 100 x 156
